AquaLux
BOAT DRAINAGE SYSTEM

This product has been specifically designed for marine applications to remove standing water from the motor well of a boat. GEM has upgraded previous versions made of brass by fabricating the motorwell thru-hull out of stainless steel, which eliminates rust, while enhancing style.

- Designed to tolerate greater transom flex
- Drains standing water in the motor well to the outside of the hull
- PVC body with stainless steel caps
- Accommodates hull thicknesses from 3 inches to 5 inches
